EDUCATION

Vellore Institute of Technology **2023 – 2027**
B.Tech CSE (Artificial Intelligence and Machine Learning) *CGPA : 8.75*

TECHNICAL SKILLS

Programming Languages: Python, SQL, C++
AI/ML: Machine Learning, Deep Learning, NLP, Generative AI, LLMs, Scikit-learn, PyTorch
LLM Engineering: Retrieval-Augmented Generation (RAG), Prompt Engineering, Embeddings, Vector Search, Hybrid Search, Model Evaluation
AI Agents & Orchestration: LangGraph, Multi-Agent Systems, Tool Calling, Workflow Orchestration
Backend & APIs: FastAPI, Flask, REST APIs, API Integration, Async Python
Databases: PostgreSQL, SQLite, ChromaDB, SQL Queries, Data Modeling
Tools & Deployment: Git, GitHub, Docker, Postman, Ollama, Streamlit

WORK EXPERIENCE

Techlene Software Solutions Pvt. Ltd., India **May 2026 – June 2026**
AI Developer Intern *Remote*

- Developed **3 business applications**: a natural-language-to-SQL chatbot for querying databases, an invoice data extraction tool, and a speech transcription and sentiment analysis tool.
- Integrated AI components, backend APIs, and data-processing workflows across the applications, working through implementation, debugging, and testing.
- Worked across the development lifecycle to troubleshoot issues, improve application reliability, and deliver functional features within project deadlines.

PROJECTS

Autonomous ColdMail AI — Python, LangGraph, FastAPI, ChromaDB

- Built a multi-agent AI outreach platform that automates company research, resume and job-description parsing, semantic skill matching, personalised email generation, quality evaluation, and human approval.
- Implemented a **RAG pipeline** using ChromaDB and embeddings, with persistent workflow state, authentication, retry handling, and human-in-the-loop controls for email approval.

AI Proposal Evaluation System (R&D) — Python, FastAPI, Scikit-learn, SHAP, Generative AI

- Built a FastAPI and Streamlit application that processes R&D proposal PDFs, extracts structured information, and generates funding recommendations using an ensemble scoring model.
- Integrated Generative AI for evaluation summaries, SHAP-based explainability, and automated PDF report generation; stored proposal and evaluation data in SQLite.

NEXUS: Local Voice AI Portfolio Assistant — Python, FastAPI, LangGraph, ChromaDB, Ollama

- Built a local-first voice AI assistant using RAG to answer questions about portfolio skills, projects, and experience through natural-language interaction.
- Implemented hybrid retrieval using Sentence Transformers, ChromaDB, and BM25, with LangGraph-based query routing, retrieval retries, and faster-whisper for local speech-to-text.

CERTIFICATIONS

Generative AI Using IBM Watsonx (IBM) **June 9, 2025**
Oracle Cloud Infrastructure 2025 Certified Data Science Professional **September 25, 2025**
Microsoft Azure Data Fundamentals (DP-900) **June 28, 2025**

ACHIEVEMENTS

Machine Learning Lead, Google Developers Group Club (GDGC) **Oct 2025 – Sep 2026**

Ranked among the **Top 45 out of 950+ teams** in the Internal Round of Smart India Hackathon 2025.

2nd Runner-Up at the CyberShield Hackathon organised by WiCys Club.
