SUMMARY

Final-year B.Tech Computer Science student (AI/ML specialization) with a strong foundation in artificial intelligence, and machine learning. Proficient in Python, Java, C++, SQL, and modern AI/ML frameworks, with experience in backend development, REST APIs, RAG, and LLM-based applications. Strong problem-solving and analytical skills with a keen interest in building scalable, real-world technology solutions.

EDUCATION

Vellore Institute of Technology, Bhopal

Aug 2023 – June 2027

B.Tech in Computer Science and Engineering — **CGPA: 8.75**

Bhopal, Madhya Pradesh

TECHNICAL SKILLS

Languages: Python, C++, JAVA, SQL

Frameworks: FastAPI, Flask, Streamlit, REST APIs, API Integration, JSON, PySpark

AI/ML: Machine Learning, Deep Learning, Generative AI, LLMs, RAG, Fine-tuning, NLP, Computer Vision, Scikit-learn

Databases: PostgreSQL, SQLite

Tools/Cloud: Git, GitHub, Git Bash, Postman, VS Code, Jupyter Notebook, Google Colab

Coursework: Data Structures and Algorithms, Object-Oriented Programming, DBMS

EXPERIENCE

Python Developer Intern

June 2025 – July 2025

Pinnacle Labs (Remote)

- Developed basic **Python applications** using core programming concepts and object-oriented programming.
- Used basic **Python concepts** such as functions, loops, and conditional statements while developing programs.
- Debugged and tested Python programs to identify and fix common errors and improve program functionality.

PROJECTS

AI Proposal Evaluation System (R&D) | Python, FastAPI, Scikit-Learn, SHAP, Generative AI

- Designed and developed a full-stack AI evaluation platform using **FastAPI** and Streamlit to analyze **RD proposal documents**, evaluating factors such as novelty, feasibility, and financial alignment.
- Built an **ML-based scoring model** to evaluate proposals and used **SHAP-based Explainable AI** to provide insights into the factors influencing the evaluation results.
- Integrated **Generative AI** to generate evaluation summaries and **ReportLab** to create structured PDF reports, providing an end-to-end proposal evaluation workflow.

Autonomous ColdMail AI | Python, LangGraph, FastAPI, PostgreSQL, ChromaDB

- Built a **multi-agent AI outreach platform** using LangGraph to automate company research, resume/JD parsing, semantic skill matching, personalized email generation, quality evaluation, human approval, and email delivery.
- Implemented **RAG-based personalization** with ChromaDB and embeddings, integrating Redis caching and PostgreSQL for contextual retrieval, persistent workflow state, and efficient AI processing.
- Developed a **production-oriented FastAPI backend** with authentication, retry handling, checkpointed human-in-the-loop workflows, and Docker-based containerization for reliable deployment.

CERTIFICATIONS

- Generative AI Using IBM Watsonx** (IBM)
- Microsoft Azure Data Fundamentals** (DP-900)

ACHIEVEMENTS

- Leading a **15+ member** technical team as **Machine Learning Lead** at Google Developers Group Club (GDGC), Oct 2025 – Present.
- Reached the internal Finalist round of Smart India Hackathon 2025, ranking in the **top 45 of 950 teams**.
- Secured **2nd Runner-up** at CyberShield Hackathon, organized by the WiCyS Club.
